Springer. Paperback. Condition: New. 300 pages. Dimensions: 9.2in. x 6.2in. x 0.7in. Smart graphics are pervasive in our lives nowadays. The ways artists and designers produce images that effectively support human cognition and communication are continuously changing and evolving as they incorporate novel methods provided by the advances in science and technology. As a counterpart, the radically new visions in most art forms have stimulated scientists to breath-taking levels of achievement. This symbiotic relationship between art and science (and technology) is one of the foundations of the technological culture of contemporary society and is especially evident in the creation of smart graphics. Such a process rests on a deep understanding of the fundamentals of perception and cognition as they relate to interaction and communication technologies, together with artificial intelligence and computer graphic techniques, to automate reasoning and enhance cognition. The International Symposium on Smart Graphics 2009 was held from May 28-30 in Salamanca, Spain. With this edition we celebrated our tenth anniversary: a successful series of inspiring and exciting meetings originating in 2000 as an American Association for Artificial Intelligence Spring Symposium. This year we proposed a specific emphasis on visual analytics as well as all kinds of transversal research that harnesses the power of humans and technological artifacts in order to convey, understand and deal with complex scientific and social processes. We were lucky to have Daniel Keim and Jorn Kohlhammer, two internationally renowned experts on this area of research, as invited speakers. This item...
