

Magical experiments or, Science in play

By Tom Tit

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 54 pages. Dimensions: 9.5in. x 7.3in. x 0.0in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1892 Excerpt: . . . the experiment of the physical laboratories called the cup of Tantalus, which is based on the principle of the siphon. Pour some water into the egg-shell, which will mount until it attains the level of the thimble; then the siphon is set in action, and all the water makes a lively exit through the straw. You may continue to pour your water at regular intervals into the shell, but your audience will be convinced that by some mysterious means it empties itself with equal regularity. The Flattening of the Earth at the Poles. --Its Rotundity at the Equator. By the simple apparatus which we are about to construct, you can explain to a child how the earth, by 210 FLATTENING OF THE EARTH AT THE POLES. revolving on its axis, has become flattened at the poles and rounded at the equator. For the earth was a...

Reviews

Extremely helpful to all category of individuals. I have got go through and that i am confident that i will likely to read through once again again later on. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Nikita Herzog**

Great electronic book and useful one. It can be writter in straightforward terms rather than difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.
