Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Ryan-McDonald Mfg; Co: Manufacturers of Dump Cars, Light Locomotives, Flat Cars, Hoisting Engines, Horse Power Drums, Derrick Fittings, Winches, Boilers, Etc;,, Office, No; 44 South Street, Baltimore, MD Having been engaged for several years in contract work in many different States in the Union, and extensively in railroad grading and masonry, we have felt the need of thorough-working special machinery, and with this end in view, have improved and are building dump cars of any gauge and capacity, made from select seasoned oak and best iron, for service in grading railroads, parkways, boulevards, landscape gardening, tunneling, stone quarries, brick yards, lime works, gravel pits, plantations, levee and dock building, coal and ore docks, peat works, etc. In most cases where filling of any considerable magnitude is to be made, a contractor will find it the cheapest and best plan to build a trestle across the fill and use trains of side dumpers. Most large contractors follow this plan, and the saving in labor and time will soon pay the cost of trestle. Under ordinary circumstances there is no further outlay, and the work can be pushed to an earlier completion than if he be confined to the use of turn-table cars. We recommend these cars to be by far the cheapest and most perfect-working. We build different classes of locomotives for hauling the different sizes of cars. See pages 15 and 16.
