Neuware - Alfred Marshall, the founder of modern economics, once described economics as 'the study of mankind in the ordinary business of earning a living'. Written in the plainest possible language, Nobel Laureates including Paul Krugman, Eric Maskin, Finn E. Kydland and Vernon Smith confront some of the key issues challenging society today challenges that claim attention in any phase of the business cycle. The range of topics includes how economic tools can be used to rebuild nations in the aftermath of a war; financing retirement as longevity increases; the sustainable use of natural resources and what governments should really be doing to boost the economy. *Economics for the Curious* is an accessible but informative display of the kinds of questions economics can illuminate. It will appeal to anyone who has an interest in economics and the world around them, and we hope it will encourage further interest and study in the topic from readers everywhere. 195 pp. Englisch.
