Not illustrated. 1837 Excerpt: .voided this sediment only, whilst others have passed small crystallized scales, resembling isinglass, --others, stony shells, convex on one side, and concave on the other. Other patients passed fragments of stones, which could not be broken when pressed between the fingers, and in which several lamina; were observable. Some voided small stones entire, like those which come away after attacks of nephritic colic. Others again, who voided habitually a small round and red sand, did not void any whilst It would have been highly interesting at the time of these operations to have ascertained the nature of the stones, but chemistry was not in such an advanced state as at present: Scheele had not then published his work on the analysis of urinary calculi. using the remedy-. Very few patients passed blood in their urine, even though it had been previously bloody. Morand says also that...
