

Nanostructured Materials Selected Synthesis Methods, Properties and Applications Electronic Materials Science Technology

By -

Springer. Hardcover. Book Condition: New. Hardcover. 188 pages. Dimensions: 9.5in. x 6.3in. x 0.6in. Nanostructured Materials: Selected Synthesis Methods, Properties and Applications presents several important recent advances in synthesis methods for nanostructured materials and processing of nano-objects into macroscopic samples, such as nanocrystalline ceramics. This book will not cover the whole spectrum of possible synthesis techniques, which would be limitless, but it presents especially interesting highlights in the domains of research of the editors. Subjects that are covered include the following: chimie douce approaches for preparation of a large variety of nanostructured materials, including metals, alloys, semiconductors and oxides; hydrothermal synthesis with water as solvent and reaction medium can be specifically adapted to nanostructured materials; electrospraying as a powerful new route for the preparation of nanoparticles, especially of oxides for electroceramics; nanoparticles processed into nanostructured ceramics, by using dynamic compaction techniques; applications of nanostructured materials. This book complements the previous volume in this series (P. Knauth, J. Schoonman, eds., Nanocrystalline Metals and Oxides: Selected Properties and Applications, Kluwer, Boston, 2002). This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Hardcover.

Reviews

Undoubtedly, this is the best function by any writer. This really is for those who statte there was not a really worth reading. Its been written in an exceptionally basic way which is merely right after i finished reading through this book by which really transformed me, change the way i really believe.

-- **Dr. Deonte Hammes DDS**

The book is great and fantastic. Better then never, though i am quite late in start reading this one. I realized this publication from my dad and i advised this ebook to find out.
