

Mass-Losing Pulsating Stars and their Circumstellar Matter

Filesize: 3.58 MB

Reviews

An extremely great ebook with lucid and perfect explanations. It is full of knowledge and wisdom. It's been printed in an exceedingly straightforward way in fact it is merely right after I finished reading through this publication by which really transformed me, alter the way I believe.

Book Condition: New. Publisher/Verlag: Springer Netherlands | Observations and Theory | Editing the proceedings of a scientific meeting is not an easy task. Sometimes people who give an excellent talk do not send the manuscript by the deadline. However, this time, thanks to the punctuality of all the participants, we have this excellent volume for the workshop on mass losing pulsating stars and their circumstellar matter prepared in time. Almost all of the oral presentations including the summary are collected in this volume. We regret that we cannot put in this volume a few posters that we failed to receive before the editorial work. The workshop was planned as a small meeting with less than fifty attendants because the city of Sendai was far from the most of the active institutions. However, the number of submitted papers exceeded the SOC's expectation; many interesting contributions had to be scheduled in the poster session. Still, the oral sessions were so tight that many participants might have felt frustrated for the shortage of discussions. The organizers of the workshop have to apologize to the attendants for the inconvenience caused from such a happy underestimate about the size of the workshop. | I Recent Results of Massive Photometry.- The Sequence of Mass-Losing AGB Stars in the Magellanic Clouds.- Three Aspects of Red Giant Studies in the Magellanic Clouds.- Luminosities of AGB Variables.- Photometric Properties of Long-Period Variables in the Large Magellanic Cloud.- Stellar Sources in the ISOGAL Intermediate Bulge Fields.- GAIA: AGB Stars as Tracers of Star Formation Histories in the Galaxy and Beyond.- Characteristics of AGB Stars in the ISOGAL, MACHO and Other Databases.- II Pulsation and Properties of Mass-Losing Stars.- Structure and Evolution of AGB Stars: Current Understandings and Beyond.- Nonlinear Properties of the Semi-Regular Variable Stars.- Regular and Irregular Pulsations of...
